

T-70

SEMI-AUTOMATIC TYING MACHINE

Semi-automatic tying machine for any type of casing, continuous thread, adjustable speed, no electricity supply required.

- Type of tying: continuous string.
- Consumes rolls of string (fitted on a cone).
- Pneumatic operation (4 Kg/cm²).
- Does not required electrical power.
- Air consumption at normal speed (80 L/min).
- Knee control with fitting for automatic tying.
- 54 mm input mouth.
- Adjustable twisting.
- Speed variable from 50 to 140 op./min.
- Tying with 3 twists of string.
- Machine rests on a table (650 x 500 x 700 mm stainlees steel).
- Very easy to clean.
- Measurements: 650 x 380 x 420 mm.
- Weight: 42 Kg.
- Made of stainless steel.

RELATED MACHINES:

Manual cutter L-80, Hydraulic fillers, Continuous fillers, Mincers.

OPCIONALES ACCESSORIES:

Stainless steel table.
