

### MACHINERY FOR THE FOOD INDUSTRY

Automatic croquette and meatball former machine that may be coupled to any filler with simple or double product output and may also be connected to a batter & breading machine.

- Can be coupled to any filler (output outer diameter 30mm)
- Produces up to 7500 meatballs per hour (depending on filler speed and type of mixture). Weight can be modified by changing the shaper (15,20,25,30,35,40,50,60 gr.)
- Produces up to 10.000 croquettes per hour (changing the shaper and the output tube varies the weight) up to 50 gr.; with weights of less than 30 gr., the output can be double.
- Pneumatic operation at 6 Kg / cm<sup>2</sup>.
- Air consumption 150 liters per minute.
- Tabletop machine.
- Very easy to clean.
- Does not require electrical power.
- Weight of the machine with croquette former: 38 Kg.
- Dimensions: 860x 440 x 355 mm.
- Made of stainless steel.

#### OPTIONAL ACCESSORIES:

Table stainless steel, Connector for automatic filler, Croquettes slide, Single output tube, Double output tube.

#### RELATED MACHINES:

Grinders, Mixers, Cooking kettles, Piston fillers, Continuous fillers, Batter & breading machines, Rotating tables, Continuous fryers.
